

# DART3 TRACKER FITTING GUIDE

Fitting time approx. 30mins

## Installation Steps

- 1 Preparation
- 2 Location
- 3 Fitting
- 4 Activation

### Tools required

- Zip Ties
- Cutters
- Wire connection tools

## Step – 1 Preparation

- Please note this tracker is not waterproof.
- Identify the location of where you will fit the tracker.
- The tracker should be located away from areas where it can become damaged.
- It should have no metal obstruction between the box and the sky for best results.
- It should not be in direct vision of people entering the vehicle.
- The tracker should not impede the operation of the vehicle and all cables must be out of the way of the driver/operator.
- Ensure unit is away from source of heat/moisture.

### Standard Three Wire Install Wiring Diagram

### Wiring Diagram

Black (pin 7)= Ground

Red (pin 1)= Permanent Power

White (pin 8)= Connected to alternator signal wire or Ignition position "Engine On" (indicates engine is running).

Pink (pin 16)= Input 5

## Step 2 - Location

- Remove steering column cover
  - Identify permanent power, earth and ignition power on ignition barrel, alternatively the fuse compartment may contain the required inputs.
- Place LMU the correct way up under the dash.
  - Ensure unit is secured (must not move)
  - Ensure unit is away from source of heat/moisture
- Pack away
  - Replace covers.

## Step 3 - Fitting

Connect wires

RED = Permanent power (Must be fitted with Max 5A fuse in line)

Black = Earth

White = Ignition ON power (Not ACC) (Must be fitted with  
Max 5A fuse in line)

Pink = Input 1. This can be used to monitor Seatbelt connection,  
PTO engagement or alternate type of trigger.

If no extra monitoring is required leave Pink wire Free.
